

To: Mr.

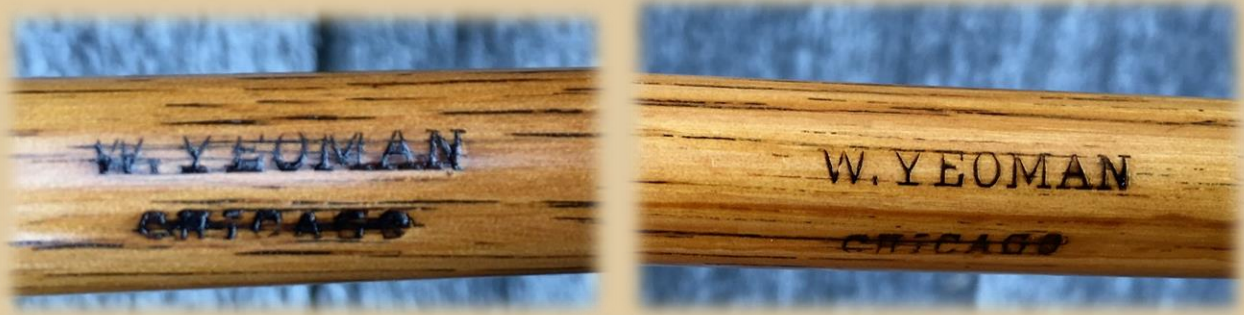

Muzzano, 30th of March 2016

Owner of this wonderful Set of Tom Stewart Yeomann Chicago model of 1922

The set came from the USA and it has been fully restored from myself in my workshop with great care.

The original W. Yeoman Hickory shaft produced in the USA are still in place.

The shafts have received 30 layers of natural shellac using the old French Polish technic.

The club heads were in pristine conditions and presented very little use.

Repairing old clubs is an art gone missing. Bringing back to playing condition such a great set was a pleasure and see them out on the golf course it is a dream come true.

Playing the old game of golf with historical Hickory Clubs is a privilege and I do wish you great fun with them and a lot of good moments with your hickory friends.
